INNOVOX MG[®]

**Reduce Porosity and Surface
Blistering without Dust**

with Market-Leading Moisture Control for the Rubber Industry

Reduce Porosity and Surface Blistering without Dust

with Market-Leading Moisture Control for the Rubber Industry

Prevent blisters and porosity with Innovox MG, the unrivalled calcium oxide MicroGranules™ from market leaders Birch Chemicals.

Available in 1kg low melt sachets, Innovox MG is designed specifically for the rubber industry. Innovox MG contains approximately 80% high purity calcium oxide powder and 20% proprietary additives for easier mixing and dispersion, available in easy-to-use MicroGranules™.

Zero Dust

Tailored for open mixer systems, with zero dust

Adaptable

Adaptable with no need for reformulation

Quality Finish

No visible specks or lumps in the finished product

Moisture Control

Removes more moisture and neutralises more acid thanks to its large surface area

Patented Tech

Patented performance technology that delivers superior performance

Available Now!

Who Are We?

For 20 years, Birch Chemicals has been delivering unrivalled products to the rubber and plastics industries. Because we produce and refine all of our raw materials on site, we guarantee the high quality, consistency and performance our customers have come to expect from us.

We're dedicated to innovation: that's why our Innovation Centres are consistently finding new ways to improve our products, lead times and formulas. And thanks to our global distribution network, Innovox MG and other Birch Chemicals products are available worldwide.
